

- ACS Fuel Tank Fill Annunciator – Self-Contained Tank Fuel Alarm
- On/Off Selector switch
- Power On indicator light
- Fuel Tank Audible Alarm
- Red Indicator Light
- Adjustable float switch –allows setting to the desired fuel tank level

Sequence Operations: *The float switch will sense the rising level of fuel in the tank, and upon reaching the predetermined full level, the switch will close turning on the audible alarm and red indicator light. The audible alarm is silenced by momentarily touching the opening on the front of the sounding source. The red tank full light will stay on as long as the full level is maintained or until the unit is shut off.*
